Motheer program is a High-tech environment that creates an easy way of communication between the involved people including the school's administrators, the teachers, the parents and the students.

Automation of e-learning in all sense of the word as the first package of Motheer provides key advantages like electronic assignments and the second package of Motheer provides key advantages like electronic lessons and electronic exams.

### Communication systems in Motheer (first package):

- 1- The message system: On-line communication between the participants in the school environment as if they are in a single house, in addition to the advantages of blocking and sending mass messages.
- 2- The forums: Facile the exchange of ideas in an exciting and smooth way.
- 3- The Notes: Eliminate the need for parents to personally sign a note. With Motheer, Notes can be signed

### E-learning systems in Motheer (first package):

- 1- Management of resources: enable users to add articles and web pages to the site.
- 2- Files Management: provides a library for each class and for the school as a whole.
- 3- The Assignments: Replace papers and pens in solving assignments as students can solve and submit their assignments electronically.
- 4- The Weeks system: marvelous way that organize the class activities.
- 5- The Classes system: transfer the school yard and classes into electronic ones.
- 6- The Advanced grading book: allows teachers to enter the grades of all the students in one page with the committing feature.

### Other benefits of Motheer program:

#### (first package)

- 1- The program supports the Arabic and English languages with the ability to support other 60 languages.
- 2- A free of errors programmed program.
- 3- The ability to export data to excel with the advantage of the publishing criteria.
- 4- A complete set of data can be developed for each user based on a pre-request by the school.
- 5- Technical support throughout the year includes uploading the users' accounts to up to 10000 accounts and more.
- 6- Detailed reports supported by the amazing filtering options.
- 7- A Calendar system for the enter events that happened throughout the year at all levels.
- 8- A special program for the conversion between Hijri and Gregorian dates of all patterns.
- 9- Help files: smooth and comfortable, illustrated step-by-step and updated permanently.
- 10- Backup of the home page and other classes related data to provide more safety.
- 11- Users management: provides full-control of the users' accounts by the administrators, creating filters and bulk user actions.
